Dear Moonshot,

It's not often that you find a job posting that piques your interest. And it's even less frequent that you find an idea that inspires you.

Reference: <https://x.company/blog/posts/why-the-electric-grid-needs-a-moonshot/>

It might not be much, but here's how I could help X (Alphabet):

- Broad experience across many industries (including energy/utilities) from my time as a management consultant
- Ability to deliver results (see attached Resume)
- Technical leadership, ownership, and vision
- Expertise in data ingestion technologies
- Expertise in functional programming paradigms
- Expertise in Akka (actor systems), which can be useful for modeling complex interactions
- Expertise in graph database technologies, which can further model and traverse relationships amongst data
- Expertise in front-end web development

Thank you for your consideration!

Sincerely,

Fellow Dreamer
